Jerwin Glen A. Lucero

QA · Data · AI — Workday Transactions Analyst at Sagility

Metro Manila, PH · UTC+8 · open to remote
jerwinglen0427@gmail.com
github.com/lucerojerwinglen-byte

Live version: jerwinlucero.vercel.app

SUMMARY

I verify HR transactions in Workday for a living, and build the tools I wish I had: an end-to-end-encrypted gift app, a budget-meal optimizer with a validated price pipeline, and an eight-app suite my team runs on. Cum Laude CS graduate moving into QA, data and AI.

SELECTED WORK

Lovewin[1]

2026 · ● live

Free, end-to-end-encrypted digital gifts for long-distance couples; the server only ever stores ciphertext. SvelteKit · Cloudflare Workers · AES-GCM · Playwright

Barato[2]

2026 · ● live

Finds the most filling fast-food order for a budget across six Philippine chains, with a hand-written dynamic-programming solver. TypeScript · React · offline PWA · GitHub Actions

CPT Tools

2026 · internal

Eight connected apps for a two-region operations team (case tracking, attendance, scoring, quality audits, forecasting) on one login and database, in production; 58 recorded architecture decisions. React · Hono · Cloudflare D1 · Playwright

EXPERIENCE

Workday Transactions Analyst · Sagility, Quezon City (hybrid)

Aug 2025 – present

- Execute HR transactions in Workday (job changes, transfers, terminations), validating every request for completeness and accuracy before processing.
- Keep audit-ready transaction logs; record anomalies and escalate failed transactions per protocol.
- Support periodic quality checks and process audits; uphold data integrity and confidentiality.

On-the-Job Trainee · Bicol University NLP lab

2024

QA for the BOSESKO mobile and web app; co-developed the e-Participation 2.0 website (WordPress); literature review for lab research.

MORE WORK

CPT Performance Dashboard[3]

2026 · open source

Excel export to team performance view, entirely in the browser; no data leaves the machine.

TypeScript · SheetJS

Pet Flap[4]

2026 · open source

One-tap flying game starring a photo of your own pet, fully on-device. TypeScript

RESEARCH

BiasX · undergraduate thesis

2024

A feature-based framework for explaining and quantifying gender bias in face classification, using Grad-CAM++ and facial landmark detection. Python · explainable AI · computer vision

Disaster-Preparedness ChatBot

2024

An LLM-powered question-answering system delivering localized disaster-preparedness information to residents. Python · LLMs · prompt engineering

Filipino Cuisine Ingredient Analysis

2024

Ethical web scraping, NLP and association analysis to find the ingredients Filipino dishes share. Python · NLP · data mining

Also built: a normalized SQL library-inventory database (2022) and Revelio, a C program that hides text inside bitmap images (2021).

SKILLS

Languages	Python, TypeScript, SQL, Java, C
Testing & QA	pytest, Vitest, Playwright (end-to-end), unit & integration testing, manual QA
Web	React, Next.js, SvelteKit, Hono, Tailwind CSS
Data & cloud	Cloudflare Workers, D1 & KV, Supabase, Drizzle ORM, GitHub Actions, Vercel
AI / ML	Prompt engineering, explainable AI, NLP, AI-assisted development
Tools	Workday (HRIS), Git & GitHub, WordPress, MS Office
Spoken	English, Filipino

EDUCATION

BS Computer Science, Cum Laude · Bicol University College of Science

2021 – 2025

Senior High School, STEM track, with honors · Ligao National High School

2021

CREDENTIALS

Passer	Civil Service Exam, Professional Level · CSC
May 2025	NurTURe 2025 Bicol Student Research Summit · UNC
Aug 2024	AI.Deas for Impact workshop · PROXY by The Oriental
May 2023	Git & GitHub seminar · BU College of Science
